IPEA/US IN CORRESPONDING INTERNATIONAL APPLICATION**

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This communication is to advise the Examiner of the favorable International Preliminary Examination Report (IPER) issued by the United States Patent and Trademark Office acting as International Preliminary Examination Authority in a corresponding international application. A copy of the IPER is enclosed.

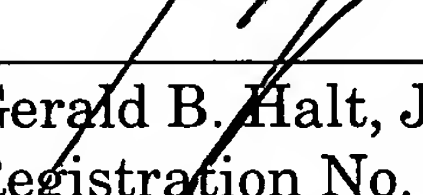

The original PCT claims correspond to claims 1-13 in this U.S. application. A copy of the approved claims as published is also enclosed.

Applicant: Menon et al.
Application No.: 10/612,156

In view of the fact that PCT claims 1-13 have all been found to meet the international standards of patentability, prompt examination and allowance of claims 1-17 are respectfully requested.

Respectfully submitted,

Menon et al.

pages NONE, filed with the demand
pages NONE, filed with the letter of _____
- ☒ the drawings:
pages 1-6 as originally filed
pages NONE, filed with the demand
pages NONE, filed with the letter of _____
- ☐ the sequence listing part of the description:
pages NONE as originally filed
pages NONE, filed with the demand
pages NONE, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language _____ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in printed form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages NONE
- ☐ the claims, Nos. NONE
- ☐ the drawings, sheets/fig NONE

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-13 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a method for transmitting system information over a communication system including a primary station and at least one wireless transmit/receive unit (WTRU), the method comprising:

Establishing a bi-directional Internet protocol (IP) link between said primary station and said WTRU; transmitting a request for system information from said WTRU to said primary station over said IP link; Retrieving said system information in response to said request; and transmitting said retrieved information from said primary system to said WTRU over said IP link.

----- NEW CITATIONS -----

NONE

What is claimed is:

1. A method for transmitting system information over a communication system including a primary station and at least one wireless transmit/receive unit (WTRU), the method comprising:

establishing a bidirectional internet protocol (IP) link between said primary station and said WTRU;

transmitting a request for system information from said WTRU to said primary station over said IP link;

retrieving said system information in response to said request; and

transmitting said retrieved information from said primary system to said WTRU over said IP link.

2. The method of Claim 1, wherein said request comprises a certain configuration, and said retrieved information is transmitted in said configuration.

3. The method of Claim 2, wherein said configuration includes billing information.

4. The method of Claim 2, wherein said configuration includes security information.

5. The method of Claim 2, wherein said configuration includes service ability.

6. The method of Claim 2, wherein said configuration includes the congestion status of the system.

7. The method of Claim 2, wherein said configuration includes data rates supported by the system.

8. The method of Claim 2, wherein said request includes information regarding a second primary station; and said WTRU switches to said second primary station in response thereto.

9. The method of Claim 8 wherein said primary station is a UMTS system and said second primary station is a WLAN.

10. The method of Claim 9 wherein the WTRU measures the strength of signals transmitted from the primary station and from the second primary station, and switches to said second station when the strength of the signal from the second station exceeds a predetermined signal strength level.

11. The method of Claim 2 wherein said primary station is a WLAN and said second primary station is a UMTS system.

12. A method for transmitting system information over a communication system including a primary station and at least one wireless transmit/receive unit (WTRU), the method comprising:

establishing a bidirectional internet protocol (IP) link between said primary station and said WTRU;

automatically retrieving and transmitting information from said primary station to said secondary station over said IP link.

13. The method of Claim 12 wherein said information relates to other communication systems.
